- None reported

WEATHER OF CONCERN

Weather of Concern

- Storm systems will continue to bring periods of rain to Northwest California through the week. The heaviest rain is expected to fall Thanksgiving day through Friday in Del Norte and Humboldt counties. Be prepared for low visibility and ponding water on roads if traveling for the extended holiday weekend. Rockslides will also likely occur in areas of steep terrain.
- Dense fog is expected to develop in the San Joaquin Valley, mainly along and west of Highway 99 through this morning. Visibilities are expected to drop to 1/4 mile or less, although visibility in some locales will likely fall to less than 500 feet.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER SYNOPSIS BY REGION

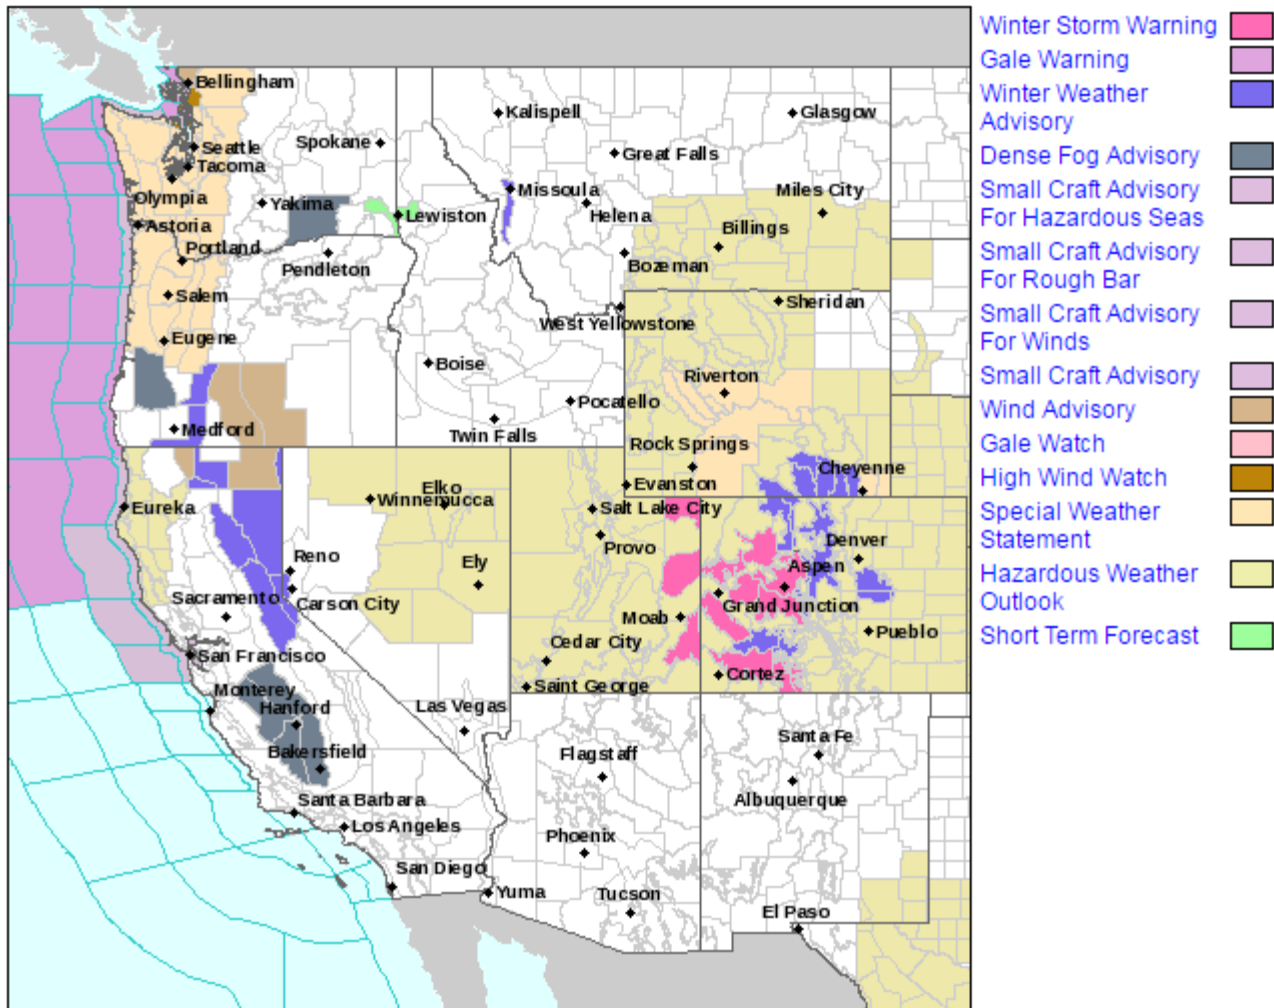

NORTHERN CALIFORNIA

The next 6 days will be wet and unsettled as a series of cold Pacific storms and cold fronts move across the region about every other day. The next storm will arrive late today and dissipate by late Wednesday. The second storm will arrive late Thursday and come to an end early Saturday, followed by the third storm late Sunday through early Tuesday. Snow levels will generally be 5000 feet and above as each system arrives, and drop to 3000-5000 feet once each cold front passes. As each system moves in southerly winds along and ahead of the cold front will gust to 20-30 mph in open areas with peak winds in wind-prone areas reaching 35-45 mph. Temperatures will be normal to below normal each day.

SOUTHERN CALIFORNIA

A weak ridge of high pressure will bring around 5 degrees of warming today. A storm moving into Northern California and the Pacific Northwest will bring slight cooling Wednesday. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes once again on Wednesday. There will be northwest to north winds of 20 to 40 mph with gusts to 60 mph from Santa Barbara County eastward into western Los Angeles County Wednesday afternoon through Wednesday night. A weak ridge of high pressure will cause temperatures to warm to a little above normal Thursday and Friday. Minimum humidity will drop into the single digits and teens away from the Central Valley and coast Thursday and Friday. Northeast to east winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and below the canyons and passes of Southern California Thursday morning. Winds will become light by late Thursday afternoon and continue to be light through Friday. A couple more storms moving into Northern California and the Pacific Northwest will cause temperatures to cool to near or a little below normal this weekend. There will be a large increase in humidity across the region, with scattered light showers over the northern half of Central California. There will also be strong westerly winds across the mountain ridges and desert passes this weekend.
